

Can you count eleven pollinators on this page?

BLACK SWALLOWTAIL

Bees aren't the only pollinators! Birds, butterflies, beetles and other insects help with the important work of pollination.

Did you know?

Electrostatic forces help grains of pollen "jump" onto bees.

HONEY BEE

Genus: Apis

Honey bees are smaller than bumblebees.

Genus: Bombus

BUMBLEBEE

Bumblebees are large and fuzzy!

HELP COUNT POLLINATORS NEAR YOU!

Populations of pollinators are declining around the world. By gathering observations of bees, butterflies, and other pollinators, you can help scientists understand pollinator health and keep our wildlife communities vibrant.
