CITIZEN SCIENCE

AT YOUR LIBRARY

Build your Citizen Science skills with these activities!

- Practice measuring flat and round objects (just need a flexible tape measure)

- Practice taking temperature of air and water (thermometer)

- Practice data collection and analyzing! Use colored beads to sort, and track your data.

- Practice finding your location in the world using a GPS. Try a phone app if you don't have a GPS!

- Practice classification and species identification using a small set of the bee/pollinator cards, or other animals cards
