

Libraries as Community Hubs for Citizen Science

Scaling, sustaining and supporting a national network of libraries interested in engaging their communities in citizen science.

National Citizen & Community Science Library Network

Goal: Build and support a network of libraries across the country to gain the confidence, skills, and knowledge to make their communities more aware and engaged in citizen science.

Network Highlights:

- 400 libraries signed-up across all 50 states.
- 10 National Sites piloting the expanded model.
- 6 National Professional Development webinars hosted since Sept 2021 with over 400 participants in attendance live.

Check out SciStarter.org/library-network to learn more.
